PROFILE

Self-driven founder and developer with hands-on experience shipping full-stack Web3 products from zero to deployment. Proficient in blockchain architecture (ERC-4337 account abstraction, smart contract design, on-chain compliance), backend systems, and Android development. Comfortable owning product vision, system design, and implementation across the stack. Active open-source contributor and AOSP developer with 116+ repositories on GitHub.

EXPERIENCE

Tranzo Nov 2025 – Present
tranzo.money

Founder

- Founded Tranzo — a self-custody crypto wallet and card ecosystem that lets users spend stablecoins at any merchant via card rails, bridging Web3 payments to the real world.
- Designed and implemented ERC-4337 account abstraction smart contracts — TranzoAccount, TranzoAccountFactory, TranzoPaymaster, TranzoDripper, and TranzoCardSession — deployed on Polygon and Base using Foundry, with ZeroDev as the bundler platform.
- Built the Android application from scratch in Kotlin using Jetpack Compose with MVVM clean architecture, integrating Android Keystore for hardware-backed private key management and biometric authentication.
- Engineered the backend in TypeScript with PostgreSQL and Redis, handling wallet creation, card session lifecycle, transaction processing, and real-time price feeds.
- Evaluated and integrated card issuance partners: Kulipa for consumer-facing Mastercard settlement via smart-contract session keys, and Reap for corporate and Dripper-based use cases.
- Built CheckPrice, a crypto price-feed tool deployed on Vercel (Next.js 14) with Binance and CoinGecko data ingestion.

Verisys Dec 2025 – Present
verisys.xyz

Technical Lead

- Building an infrastructure platform for accountable AI agents, providing identity binding and ZK-based compliance proofs so autonomous agents can operate capital on-chain with verifiable identity and regulatory accountability.
- Architecting compliance middleware that enables AI agents to execute on-chain transactions while adhering to jurisdiction-specific regulatory frameworks through zero-knowledge proofs.

GENEDAO May 2026 – Present
genedao.bio

Founder

- Founded GENEDAO — a decentralized project at the intersection of blockchain technology and genomics/biotech, building infrastructure for decentralized biodata governance.
- Currently researching and curating datasets for training AI models on genomic data, and designing the data pipeline and compute infrastructure for decentralized model training.
- Managing domain infrastructure, email routing, and deployment pipelines across Cloudflare and Vercel.

Swisstronik — Zug, Switzerland 2025 – Present
swisstronik.com

Ambassador

- Official ambassador for Swisstronik, a Layer 1 blockchain (raised \$10M from Syndicate Capital) focused on regulatory compliance, privacy-preserving dApps, and GDPR-compliant on-chain transactions using Intel SGX and ZK-SNARK technology.
- Representing the ecosystem in developer communities and driving adoption and awareness across the Indian Web3 space.

OPEN SOURCE & COMMUNITY

AOSP Developer & Realme Device Maintainer 2024 – Present

Open Source Contributor

- Active Android Open Source Project (AOSP) developer building and maintaining custom ROM distributions for Realme devices since 2024.
- Maintained custom ROM builds for Realme 5 series (Realme 5s, Realme 5i, Realme 5 Pro) and Realme C series phones — handling kernel configuration, device tree bring-up, vendor blob integration, SELinux policy, and OTA updates.

- Collaborated with the Realme TechUp team on device-level software testing, bug triage, and community-driven feedback programs.

GitHub

github.com/Pranav00x

116 public repositories

- Maintaining an active GitHub presence with 116 repositories spanning Web3 tooling, wallet generators, DeFi utilities, Telegram bots, and on-chain automation scripts.

EDUCATION

IIT Madras 2026 – Present

BS in Data Science and Applications

Ram Prasad Dutt Janta +2 High School, Jitwarpur Passed March 2026

Class XII — Bihar School Examination Board (BSEB) 62.4%

Pole Star Day Boarding Public School Passed 2024

Class X — CBSE 80%

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Kotlin, Solidity, C++, HTML/CSS
Frontend	React, Next.js, Flutter, Jetpack Compose
Backend	Node.js, Express, PostgreSQL, Redis
Blockchain	EVM, ERC-4337, Foundry, ZeroDev, Polygon, Base, Arbitrum, Sui, Farcaster
DevOps & Tools	Docker, Git, Vercel, Cloudflare, Telegram Bot API, Android Keystore

LANGUAGES

English (Fluent) · Hindi (Fluent)
